

**Audio
precision**

Join us in
Room 1E01
at AES NY!

Audio Precision will be exhibiting in New York at the AES NY show, demonstrating the latest in audio test, as well as hosting multiple presentations from October 17-19, 2018.

Demonstrations: Stop by our demo room to see, and learn more about, the latest software release, **APx v4.6**, and how engineers can now conduct open-loop measurements using a chirp test signal. We will have in-suite presentations on a variety of audio topics as well (see below).

Paper Sessions: Additionally, be sure to catch AP paper sessions as part of the formal AES technical program. Jayant Datta and Mark Martin will be presenting, "**Measuring Audio when Clocks Differ**" on October 18. Dan Foley will be presenting, "**Improving Audio Performance Microphones Using a Novel Approach to Generating 48 Volt Phantom Powering**" on October 19.

Demo Room Presentations:

October 17, 2018

2:00pm: "Audio Test in the Age of Digital Nomads"

by Ryan O'Connor

4:00pm: "Making the Most of Open Loop Testing"

by Chris Gill

October 18, 2018

11:00am: "Making Speaker and Microphone Measurements Without an Anechoic Chamber" by Tony Spica

3:00pm: "This is Not your Father's Stereo System - Characterizing Audio Performance of Today's Multi-layered Audio-Playback Systems" by Dan Foley

Visit us in room 1E01 (on the first floor) to receive demonstrations and learn more about audio test and measurement!
